

THINKING ABOUT Emerging Technologies like a CIO

We spoke to IT leaders and decision-makers to get a behind-the-scenes look at the technologies they've invested in recently and what they have their eye on for the future.

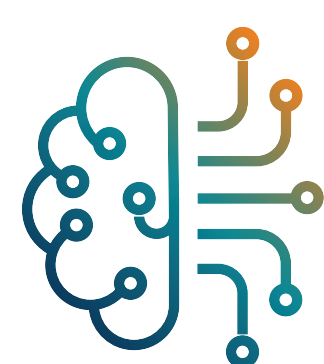

Shift in Investment Areas from the past 12 months to the next two years

“We’re experimenting, but also hoping to become a player in the area of IoT.”
CTO/CIO, PRINTING TECHNOLOGY COMPANY

“SDN is a key enabler for us. You get fantastic agility and information security, plus 100% application monitoring.”
CIO, AUTOMOTIVE DISTRIBUTION AND RETAIL COMPANY

Most popular areas IT Leaders invest in are:

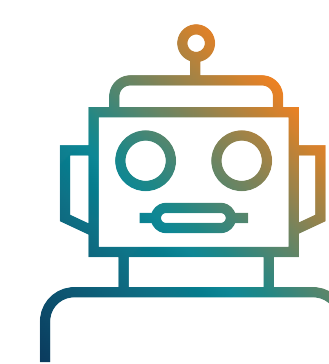

Artificial Intelligence

Infrastructure Monitoring

Cloud or Multi-Cloud Computing

Robotic Process Automation

Although cloud and AI have the top spots for future investment, we see a broader distribution across all emerging technologies in the next 24 months.

What else are CIOs thinking about?
